

May 19, 1942.

Mrs. Isabelle M. Stover,  
Reef Point, Bar Harbor, Maine.

Dear Mrs. Stover:

Thank you for your letter of May 13th enclosing letter received from the Chief of the Bureau of Forests in Harrisburg, Pa. regarding the Bulletin No. 11 on Trees of Pennsylvania. I think it is not so necessary at the price quoted. So please ask Mrs. Farrand not to bother ordering it; if sometime I run across it in a second hand store I can decide if it is worth while adding to our collection. The other ten cent bulletin of course I can get by mail and get my name on their list. I am returning Mr. Emerick's letter as requested.

Your description of the lovely spring blooms at Reef Point sound most alluring and I am sure you get as much enjoyment out of your lovely surroundings as I do. Then having Mrs. Farrand back adds interest to the work. Our Spring in Washington comes so early and lasts such a little while, I often wish I could make the period of early spring flowers longer. Our rhododendrons are out and the syringas and weigelas and loads of roses.

With kind greetings, I am

Very sincerely,
